## ANNUAL BULL AND FEMALE SALE

Saturday, March 2, 2019 || Broken Bow Livestock

1:00 PM (CST) in Broken Bow, Nebraska

| RAISING CATTLE WITH THE VALUE OF HETEROSIS SINCE 1984 |

# WELCOME TO THE SALE...

## | RAISING CATTLE WITH THE VALUE OF HETEROSIS SINCE 1984 |

As we are about to begin the third month of 2019, I'd like to pause for a moment and reflect on the year of 2018. Our calving season was challenging due to what Mother Nature threw at us in January and February. The growing season seen abundant rains, with plenty of grass. We had a wonderful event happen in our family at Christmas time. As you can see in the family photo, by Daniel Dunlap Photography, we have another daughter! Logan and Katie were married the 28th of December. We are so excited and very proud that she has become part of our family.

We are very excited for you all to evaluate this set of bulls and heifers that we are offering this year! As always, we used some of the top AI Sires in the Angus and Simmental breeds in our breeding program. In the group of Angus bulls, there is calving ease bulls, big spread bulls from birth to yearling, and high growth bulls. We have bulls that can sire tremendous females and bulls with carcass merit. In the group of SimAngus™ bulls, we have percentages from ¼ blood to 5/8 blood. As you can see there is calving ease bulls, low birth weight bulls as well as high growth bulls. The bulls can be used as an All Purpose sire or as a Terminal cross sire. All of the bulls have been Genomic tested, ultra sounded, a semen evaluation has been done and are satisfactory breeders. All of these bulls were born and raised on our ranch and were weaned together and developed in the same 9 acre pen. The ration they've been fed consists of cane silage, MDG, ground cane, ground alfalfa and cracked corn. We don't feed our bulls to maximize the numbers. We grow our bulls with respectable average daily gains so as to see what they're capable of and develop them in a manner to keep them structurally sound for years of use for our customers.

The heifer offering this year consists of 15 registered SimAngus™ and 5 registered Angus. They are on a complete health program and have been Bangs vaccinated. We will transfer the registration to you at no additional cost if you so desire. These heifers will make wonderful productive cows!

We realize everyone's lives have become very full of activities, so if you're not able to attend our sale on March 2, we urge you to come to the ranch anytime prior to the sale and view the sale offering in their environment. Then on sale day, view the sale on DV Auction.

The bulls and heifers will be at Broken Bow Livestock Friday afternoon, March 1. Come early on Saturday and join us for lunch at 11:30 am.

This is our personal invitation to you, our friends and customers, current and new, to attend our annual bull and heifer sale, Saturday March 2 at Broken Bow Livestock at 1:00 pm.

Sincerely,  
Tim & Kristi Mason

# ANNUAL BULL AND FEMALE SALE

Saturday, March 2, 2019 | Broken Bow Livestock  
1:00 PM (CST) in Broken Bow, Nebraska

## AUCTIONEER

Matt Printz 308-440-2918

## LIVESTOCK PRESS REPRESENTATIVES

Randy Rasby, *Livestock Plus Inc.* 308-539-6195  
Chris Beutler, *Midwest Messenger* 402-380-8244  
Jay Nordhausen, *Special Assignment* 308-289-1548

## SALE DAY PHONES

Broken Bow Livestock 308-872-3334  
Tim Mason 308-643-9403  
Corey Wilkins 256-590-2487

## ONLINE BIDDING

Sale will be broadcast live on the internet at [www.DVAuction.com](http://www.DVAuction.com). Application for buyer number needs to be approved the week prior to March 2. See page 2 for more information.

## ABSENTEE BIDS

You may leave your bids with one of the Sale Representatives, Auctioneer, Corey Wilkins or Tim Mason.

## FIRST BREEDING SEASON GUARANTEE

Bulls selling for \$3,000 or more are guaranteed against a breeding injury during their first breeding season. The breeding season is defined as the 60-day period following the first turnout of the purchased bull.

Please notify us as soon as possible when an injury occurs and has been diagnosed by a licensed Veterinarian and prior to the injured bull being sold. A copy of the sales receipt must be received by Mason Angus and SimAngus™ for proper credit. All claims must be made by Sept 1, 2019.

If a replacement is available one will be provided. Otherwise you will be given a credit of the purchase price, less the salvage value of the bull, to be used in our next annual sale.

This does not cover against mismanagement or neglect. We do not guarantee against death or injuries sustained prior to the breeding season. Mortality insurance is suggested.

## DELIVERY

A \$100 discount will be given per head if picked up the day of the sale. This has to be determined at time of settlement. Free delivery in Nebraska. We will begin delivering bulls April 1.

## VIDEOS

Video of all sale animals will be available by visiting us at [www.MasonAngusSimAngus.com](http://www.MasonAngusSimAngus.com) or [www.dvauction.com](http://www.dvauction.com).

## SEMEN INTEREST

Mason Angus and SimAngus will retain 1/3 semen interest in all bulls selling. Buyer receives full possession and salvage value.

## TERMS AND CONDITIONS

Terms of the sale are cash. All animals will be sold to the highest bidder. Changes in the catalog will be announced sale day and will take precedence over printed material in the catalog. A supplement sheet with updated information will be provided sale day. All cattle are the buyer's property as soon as sold and will be cared for at the buyer's risk. Any person attending the sale does so at their own risk. Neither, the sale management, owners, or sale facility will be held liable for any injuries. Not liable for any inaccuracies.

## HOSPITALITY

Rolls and coffee will be available in the morning. Lunch will be available at 11:30 am.

## ACCOMMODATIONS

Cobblestone Hotel 308-767-2060  
*Broken Bow, NE*  
The Boarders Inn & Suites 308-872-6428  
*Broken Bow, NE*

## ULTRASOUND

Megan Gotschall of Ranch County Cattle Services performed all ultrasound work done on the bulls and heifers.

## HERD HEALTH

Total herd health is provided by Broken Bow Animal Hospital. All bulls have been fertility examined and deemed Satisfactory Breeders. Scrotal measurements were done by BBAH.

## VIEWING

All bulls and heifers can be viewed, at anytime prior to the sale at Mason Angus and SimAngus Ranch. Ranch located 2 ½ miles North, 2.5 miles East, and 1/12 miles North of Anselmo, NE. The sale animals will be available for viewing anytime after 2:00 pm Friday, March 1 at the Broken Bow Livestock sale facility.

## SALE MANAGEMENT

Marty Ropp 406-581-7835  
Corey Wilkins 256-590-2487  
[www.alliedgeneticresources.com](http://www.alliedgeneticresources.com)

Welcome to the 2019 edition of Mason Angus & Simangus™ Bull and Female Sale. Tim & Kristi have assembled another strong offering of commercially focused bulls that will go on and make a positive impact on cattlemen's bottom line. Although the sale is young in age, the Mason family is no newcomer to the seedstock industry. The Mason family has been raising high caliber Angus and Simangus™ bulls for several decades. Study the pedigrees closely and you will find proven, profit-oriented genetics stacked across the board. From a genetic standpoint, I am confident you will find bulls in abundance that will move your program in the right direction. Likewise, the Masons are committed to running their cattle to mimic a commercial cow-calf operation. These bulls must perform on a high forage diet and receive no pampering in terms of creep feed or special treatment. These bulls are developed to last with the commercial bull buyer in mind.

The Angus bulls that lead off the catalog read excellent in terms of their genetic predictors and combine a solid set of data with an extra punch of rib shape and stoutness. The Mason family, through genetic selection in their Angus program, feature several growth-oriented "power bulls" in the Angus offering. Likewise, you will find several calving ease specialists in the Angus selection that will be great fits for heifer matings. Ultimately, I am confident you will find a well-rounded offering in what the Angus bulls that can suit many of your needs.

If you are looking to add some heterosis in your cow herd, I encourage you to take a strong look at an impressive lineup of Simangus™ bulls. The sire groups feature the most proven genetics in the breed that have worked exceptionally well across the country. The GW Wulpack sons offer the added length and growth expected of Simmental influenced genetics and will impress on sale day. The CCR Boulder and Gibbs The Rock sons offer modest birth weights and big spreads from birth to yearling.

Finally, the females come from the heart of the Masons replacement pen and, as past buyers will attest, will work in registered and commercial programs alike.

On behalf of the Mason Family we invite you to join us March 2 in Broken Bow. If you can't be with us on sale day, be sure to catch the sale live on DV Auctions. If you need any assistance or need any further information, please do not hesitate to give myself or anyone associated with the sale a call for honest service.

Sincerely,  
*Corey Wilkins*

## American Simmental Association Quick Reference to EPDs, Indexes and \$Values

**ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

**BACK FAT (BF):** Inches of carcass backfat at 475 days.

**BIRTH WEIGHT (BW):** Pounds of birth weight.

**CALVING EASE (CE):** Percent of unassisted births when used on heifers.

**CARCASS WEIGHT (CW):** Pounds of carcass weight at 475 days.

**STAYABILITY (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**DOCILITY (DOC):** Percent of offspring receiving a disposition score of 1 (docile).

**MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.

**MARBLING (MARB):** Carcass marbling score at 475 days.

**MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.

**RIBEYE AREA (REA):** Square inches of carcass ribeye at 475 days.

**TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

**WEANING WEIGHT (WW):** Pounds of weaning weight.

**YEARLING WEIGHT (YW):** Pounds of yearling weight.

**YIELD GRADE (YG):** Carcass yield grade score at 475 days.

For more detailed information about EPDs and \$indexes, visit: [www.simmental.org](http://www.simmental.org)

*Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.*

## American Angus Association EPD and \$Value Definitions

### PRODUCTION

- **CALVING EASE DIRECT (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
- **BIRTH WEIGHT EPD (BW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- **WEANING WEIGHT EPD (WW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- **YEARLING WEIGHT EPD (YW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.
- **RESIDUAL AVERAGE DAILY GAIN (RADG)**, expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

### MATERNAL

- **MATERNAL MILK EPD (MILK)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
- **COW ENERGY VALUE (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

### CARCASS

- **CARCASS WEIGHT EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.
- **MARBLING EPD (MARB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.
- **RIBEYE AREA EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.
- **FAT THICKNESS EPD (FAT)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

### \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

- **WEANED CALF VALUE (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.
- **FEEDLOT VALUE (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.
- **GRID VALUE (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.
- **BEEF VALUE (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

# Allied Opportunities

Delivering the very best genetics and customer service.

## ALLIED SEMEN AND GENETICS

Dominate value and unequaled selection.  
Contact us about options for 2019.

## ALL BEEF, LLC

A revolutionary new plan for the beef genetics business.  
Become a part of this growing team!

## ALLIED FEEDING PARTNERS, LLC

Seedstock providers doing what is right for their  
customers, their industry and their future.

## FEEDER CATTLE MARKETING

Reach out to Clint Berry and his team for experienced and  
professional value-added options.

## PROFESSIONAL DATA SERVICES

Is your business getting the most value from your data?  
We can help.

## FUTURE-FOCUSED GENETIC AUDITS

Genetics are a 10-20 year investment.  
Advance to the next level with an Allied genetic audit.

Allied opportunities are focused on the future of genetic improvement and service - Join our team!
