**Saturday, March 7, 2020 || Broken Bow Livestock**

**1:00 PM (CST) in Broken Bow, Nebraska**

**| RAISING CATTLE WITH THE VALUE OF HETEROSIS SINCE 1984 |**

# WELCOME TO THE SALE...

## | RAISING CATTLE WITH THE VALUE OF HETEROSIS SINCE 1984 |

Welcome to our annual Bull and Heifer sale. It's a new year in a new decade with optimism abound. We are excited for you to evaluate the set of bulls and heifers we are offering this year.

As 2019 unfolded, challenges just kept coming at us. We've made it through it and we're stronger for it and so are our cattle.

We calve our heifers in January and most of our cows calve in February. Our heifers and cows calve in what I like to refer to as "my fresh air calving barn", so we see first hand the mothering ability of our cows. If she isn't a good mother or has a bad attitude, I don't put up with them. They go to my Packing House Relocation Program! I'm very pleased with the results! They went about their business of birthing the calf and being a very attentive mother in the crucial first few hours, even under the most challenging of conditions. As we moved into the summer months and the abundance of moisture and the lush green grass they did their best to raise their calves. With that being said, the bulls were weaned on August 17th and the heifers were weaned October 1st. In both instances the weights taken on those two days were less than they've been in past years. As you go through our catalog and study the numbers, our calves receive no creep feed while they are on their mommas and the heifer calves never receive an implant. Since the cattle have been weaned they have done very well in our development programs.

We are offering 23 Angus and 28 SimAngus bulls, along with 11 registered Angus and 20 registered SimAngus heifers. The bulls will be semen tested and guaranteed 100% as breeders. They will have been genomically tested to prove parentage and to increase the accuracies of their EPD's and ultra sounded as well. With our bulls we focus on structure, muscling, their feet and legs and their ability to walk out, phenotype and attitude. Heifers, their structure, muscling, frame size, cow family attributes, phenotype and attitude are all considered. The heifers have been ultra sounded and have had their pre-breeding health shots. All of our cattle's health programs are under the advisement of the veterinarians at the Broken Bow Animal Hospital. We not only want our cattle to perform well in our herd, we want them to perform and do well in your herd as well!

Our sale will be held at Broken Bow Livestock on Saturday, the 7th of March starting at 1:00 pm. The bulls and heifers will be in the pens to the east of the salebarn Friday afternoon. We will have coffee and rolls available Saturday morning and serving lunch at 11:30.

We understand everyone's lives are very busy anymore, so if this date conflicts with something and you're needing a bull or heifer, please come to our ranch anytime prior to the sale and go through the sale offering in their own environment and if there's something you like, the sale will be broadcast live on DV Auction, so you can place your bids there. Or you can call either of our press representatives, the auctioneer or myself sale day and we will do our best to assist you in filling your needs.

We thank you for your interest in and support of our program. We appreciate our friends and neighbors and customers very much. Please join us on March 7th!

Sincerely,  
Tim & Kristi Mason

# ANNUAL BULL AND FEMALE SALE

Saturday, March 7, 2020 | Broken Bow Livestock  
1:00 PM (CST) in Broken Bow, Nebraska

## AUCTIONEER

Matt Printz 308-440-2918

## LIVESTOCK PRESS REPRESENTATIVES

Randy Rasby, *Livestock Plus Inc.* 308-539-6195  
Chris Beutler, *Midwest Messenger* 402-380-8244

## SALE DAY PHONES

Broken Bow Livestock 308-872-3334  
Tim Mason 308-643-9403  
Corey Wilkins 256-590-2487

## ONLINE BIDDING

Sale will be broadcast live on the internet at [www.DVAuction.com](http://www.DVAuction.com). Application for buyer number needs to be approved the week prior to March 7. See page 2 for more information.

## ABSENTEE BIDS

You may leave your bids with one of the Sale Representatives, Auctioneer, Corey Wilkins or Tim Mason.

## FIRST BREEDING SEASON GUARANTEE

Bulls selling for \$3,000 or more are guaranteed against a breeding injury during their first breeding season. The breeding season is defined as the 60-day period following the first turnout of the purchased bull. Please notify us as soon as possible when an injury occurs and has been diagnosed by a licensed Veterinarian and prior to the injured bull being sold. All claims must be made by September 2020. If we have a comparable bull available he can be provided to get your cows covered this year, otherwise you will be given a credit of the purchase price of the injured bull less \$1500. (buyer keeps salvage value), to be used in next year's annual sale. This does not cover against mismanagement or neglect. We do not guarantee against death or injuries sustained prior to the breeding season. Mortality insurance is suggested.

## DELIVERY

A \$100 discount will be given for each bull taken home on sale day. We will start delivering bulls for free in Nebraska after April 1. We suggest, if you purchase a heifer that you take them sale day or as soon as possible afterwards to get them home to their new environment and feed management to be ready to fit well into your breeding program.

## VIDEOS

Video of all sale animals will be available by visiting us at [www.MasonAngusSimAngus.com](http://www.MasonAngusSimAngus.com) or [www.dvauction.com](http://www.dvauction.com).

## SEMEN INTEREST

Mason Angus and SimAngus will retain 1/3 semen interest in all bulls selling. Buyer receives full possession and salvage value.

## TERMS AND CONDITIONS

Terms of the sale are cash. All animals will be sold to the highest bidder. Changes in the catalog will be announced sale day and will take precedence over printed material in the catalog. A supplement sheet with updated information will be provided sale day. All cattle are the buyer's property as soon as sold and will be cared for at the buyer's risk. Any person attending the sale does so at their own risk. Neither, the sale management, owners, or sale facility will be held liable for any injuries. Not liable for any inaccuracies.

## HOSPITALITY

Rolls and coffee will be available in the morning. Lunch will be available at 11:30 am.

## ACCOMMODATIONS

Cobblestone Hotel 308-767-2060  
*Broken Bow, NE*  
The Boarders Inn & Suites 308-872-6428  
*Broken Bow, NE*

## ULTRASOUND

Megan Gotschall of Ranch Country Cattle Services performed all ultrasound work done on the bulls and heifers.

## HERD HEALTH

Total herd health is provided by Broken Bow Animal Hospital. All bulls have been fertility examined and deemed Satisfactory Breeders. Scrotal measurements were done by BBAH. The heifers are up to date on all health shots and have had a Preg-Guard 10 vaccination.

## VIEWING

All bulls and heifers can be viewed, at anytime prior to the sale at Mason Angus and SimAngus Ranch. Ranch located 2 ½ miles North, 2.5 miles East, and 1/12 miles North of Anselmo, NE. The sale animals will be available for viewing anytime after 2:00 pm Friday, March 6 at the Broken Bow Livestock sale facility.

## SALE MANAGEMENT

Marty Ropp 406-581-7835  
Corey Wilkins 256-590-2487  
[www.alliedgeneticresources.com](http://www.alliedgeneticresources.com)

Welcome, Cattlemen, to the 2020 edition of the Mason Angus & Simangus bull and female sale! The Mason family is bringing you their deepest set of bulls to date, along with a quality set of replacement females. You will find genetics from cover to cover – these are widely regarded as some of the most profit-oriented genetics in the beef business.

The Mason family should be commended for the manner in which the bulls are developed; additionally, the way the seedstock cows are run is top-notch. The cattle receive no “creep feed” and are managed under intensive rotational grazing. Performance is “truly bred on and not fed on” at the Mason operation. They strive to run their cows in an environment mimicking their commercial customer base. Likewise, past customers will attest to the bull’s longevity when placed in production. Finally, the attention focused on those traits having the greatest impact on their customer’s profitability is always foremost in the breeding decisions for the Mason family. Growth, calving ease, and strong carcass traits will be strengths in all the bulls marketed.

If you have not checked out the Mason family’s bull and female offering we strongly encourage you to make the trip to the ranch, or be with us on March 7th in Broken Bow, NE. The trademark of the Mason operation is focused on high caliber genetics, with these being geared toward moving you ahead at sensible prices. If you cannot be with us on Sale day, be sure to catch the sale on DVauctions.com. Also, feel free to call us with any questions regarding this sale offering.

Sincerely,  
*Corey Wilkins*

**Genomic enhanced EPDs. ET**  
A Rock son who is as physically appealing as any in the offering. He is long bodied, sound footed, and always catches your eye going through the bulls. Likewise, his modest BW EPD appears to be a suitable candidate to utilize on heifers.

## American Simmental Association Quick Reference to EPDs, Indexes and \$Values

**ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

**BACK FAT (BF):** Inches of carcass backfat at 475 days.

**BIRTH WEIGHT (BW):** Pounds of birth weight.

**CALVING EASE (CE):** Percent of unassisted births when used on heifers.

**CARCASS WEIGHT (CW):** Pounds of carcass weight at 475 days.

**STAYABILITY (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**DOCILITY (DOC):** Percent of offspring receiving a disposition score of 1 (docile).

**MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.

**MARBLING (MARB):** Carcass marbling score at 475 days.

**MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.

**RIBEYE AREA (REA):** Square inches of carcass ribeye at 475 days.

**TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

**WEANING WEIGHT (WW):** Pounds of weaning weight.

**YEARLING WEIGHT (YW):** Pounds of yearling weight.

**YIELD GRADE (YG):** Carcass yield grade score at 475 days.

For more detailed information about EPDs and \$indexes, visit: [www.simmental.org](http://www.simmental.org)

*Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.*

## American Angus Association EPD and \$Value Definitions

## PRODUCTION

- **CALVING EASE DIRECT (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
- **BIRTH WEIGHT EPD (BW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- **WEANING WEIGHT EPD (WW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- **YEARLING WEIGHT EPD (YW EPD)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.
- **RESIDUAL AVERAGE DAILY GAIN (RADG)**, expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

## MATERNAL

- **MATERNAL MILK EPD (MILK)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
- **COW ENERGY VALUE (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

- **CARCASS WEIGHT EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.
- **MARBLING EPD (MARB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.
- **RIBEYE AREA EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.
- **FAT THICKNESS EPD (FAT)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

- **WEANED CALF VALUE (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.
- **FEEDLOT VALUE (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.
- **GRID VALUE (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.
- **BEEF VALUE (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
